Create amazing spaces and high quality customer experiences at a fraction of the cost.

3M DI-NOC ARCHITECTURAL FINISHES

3M DI-NOC Architectural Finishes are self-adhesive materials that are designed for interior and exterior decoration, along with refurbishment projects.

Every surface becomes a potential project to rehabilitate and redesign space. With more than 800 different patterns in the range, endless application opportunities are possible on; ceilings, walls, facades, doors, columns, bars, counters, cupboards, lifts, partitions, department stores, offices, restaurants, lobbies, bathrooms, hospitals, banks and conference rooms.

3M DI-NOC TREND LINE

Trend Line incorporates the most popular 80 patterns, including metallics, fabrics, wood, leather, carbon and single colour finishes.

Application of DI-NOC self-adhesive products can be done in situ, meaning modifications to surface designs in intricate environments can be done with minimal disruption.

Key Benefits

- Cost savings over traditional remodelling costs
- Faster to install with minimal preparation, noise and mess
- Easier to repair damaged film section
- Fire resistant and IMO certified for peace of mind

3M DI-NOC EXTENDED RANGE

The wider range includes 850+ additional patterns including metallic, fabrics, flip colours, wood, leather, carbon and single colour for decoration and refurbishment. The film is tested according to the EN 15102: 2008 with some patterns also offering EN13501-1. The extended range also includes E-series, which is a PVC free option for environmentally friendly projects, and EX series that is suitable for exterior applications.

**3M Endorsed
Installer**

Lustalux uses materials from only the best brands, and our installers are all manufacturer trained and approved giving our clients confidence in the knowledge that both materials and workmanship are fully guaranteed.

3M COVER STYL' **LG Hausys**

“

We've been open since 2008 and the toilets were looking a bit dated. We initially had the idea of renovating the whole toilets, which involved ripping the spaces out and fitting new IPS panels and new toilet cubicles. After a bit of investigation we found that it was quite a costly experience and the panels were not actually in bad condition. So we looked at Lustalux for another option; more cost effective and time efficient. So that would involve wrapping the toilets and giving them the look and feel of new toilets, without having to rip out all the existing furniture and equipment.

AVERY DENNISON FACADE FILM

Avery Dennison Facade Film is available in 22 standard colours, with these off the shelf colours covering a broad range to suit your needs. Colour matching is also available. The application of wrapping vinyl is an extremely specialised process and although Lustalux has had these capabilities for many years, we have now received official recognition from one of the main manufacturers, Avery Dennison.

Although wrapping is normally associated with vehicles, there is a growing demand for the covering of numerous architectural surfaces. The facade film is an external grade vinyl guaranteed for up to ten years and is an addition to our range of 3M Di-Noc, Cover Styl', and LG Hausys internal architectural wrapping films.

Key Benefits

- Fast, clean and easy redecoration
- Conforms over curved, irregular surfaces for a smooth paint-like finish
- Cost effective solution versus conventional paint
- Minimal disruption and downtime
